

## Token Buyback Program

SPECTRE's team will use up to 3% of fees generated to buyback outstanding SPECTRE utility-tokens as part of a token-buyback-program. SPECTRE plans to purchase 15% of utility-token supply and this will be burned. Along with volume based dividends to dividend-token holders, the buyback program is a vote of confidence by the SPECTRE management team and by reducing the supply of traded utility-tokens, serves to further add support to the utility-token price.
